Art Unit: 1616

Claims 2-18 have been canceled by applicant in the preliminary amendment of 11/3/2003. Claim 1 remains pending in this application.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Mardi et al. (US 4,595,591).

Mardi et al. explicitly disclose a composition in the form of “two vials, the first containing a sodium nitrite solution, the second a solution of other components” (column 9, lines 58-61). The “other components” in the second vial contains nitric acid in a concentration and amount that gives the combined solutions a pH of below about 1 and organic acids (column 2, lines 26-37; column 5, lines 10-62). Mardi’s composition is used to treat conditions such as verruca vulgaris and condyloma acuminatum (column 12, line 60; claim 1).

The claim is thereby anticipated. The intended use claim feature is met because verruca vulgaris and condyloma acuminatum are conditions that are caused by the human papillomavirus. Mardi’s treatment is therefore an antiviral treatment. Although Mardi et al. do not explicitly state the release of “NO or NO<sub>2</sub> ions,” such an effect would be a necessary consequence of combining Mardi’s two vials, because the acids in the second vial would react with the nitrite in the first vial to release the same agents as applicant’s agents. Since applicant’s claim asserts release of NO or NO<sub>2</sub> ions from

mixing an acid (sufficient to reduce pH below 4 at the environment) with a nitrite, Mardi's highly acidic (pH of below 1) combined solution of acid + nitrite would necessarily release the same agents. The claim must therefore be rejected.
